

EDM Webinar 

Knowledge Models for Data Leaders: Solving the Data Management Puzzle

Part 1 of a two-part webinar series

April 28, 2022

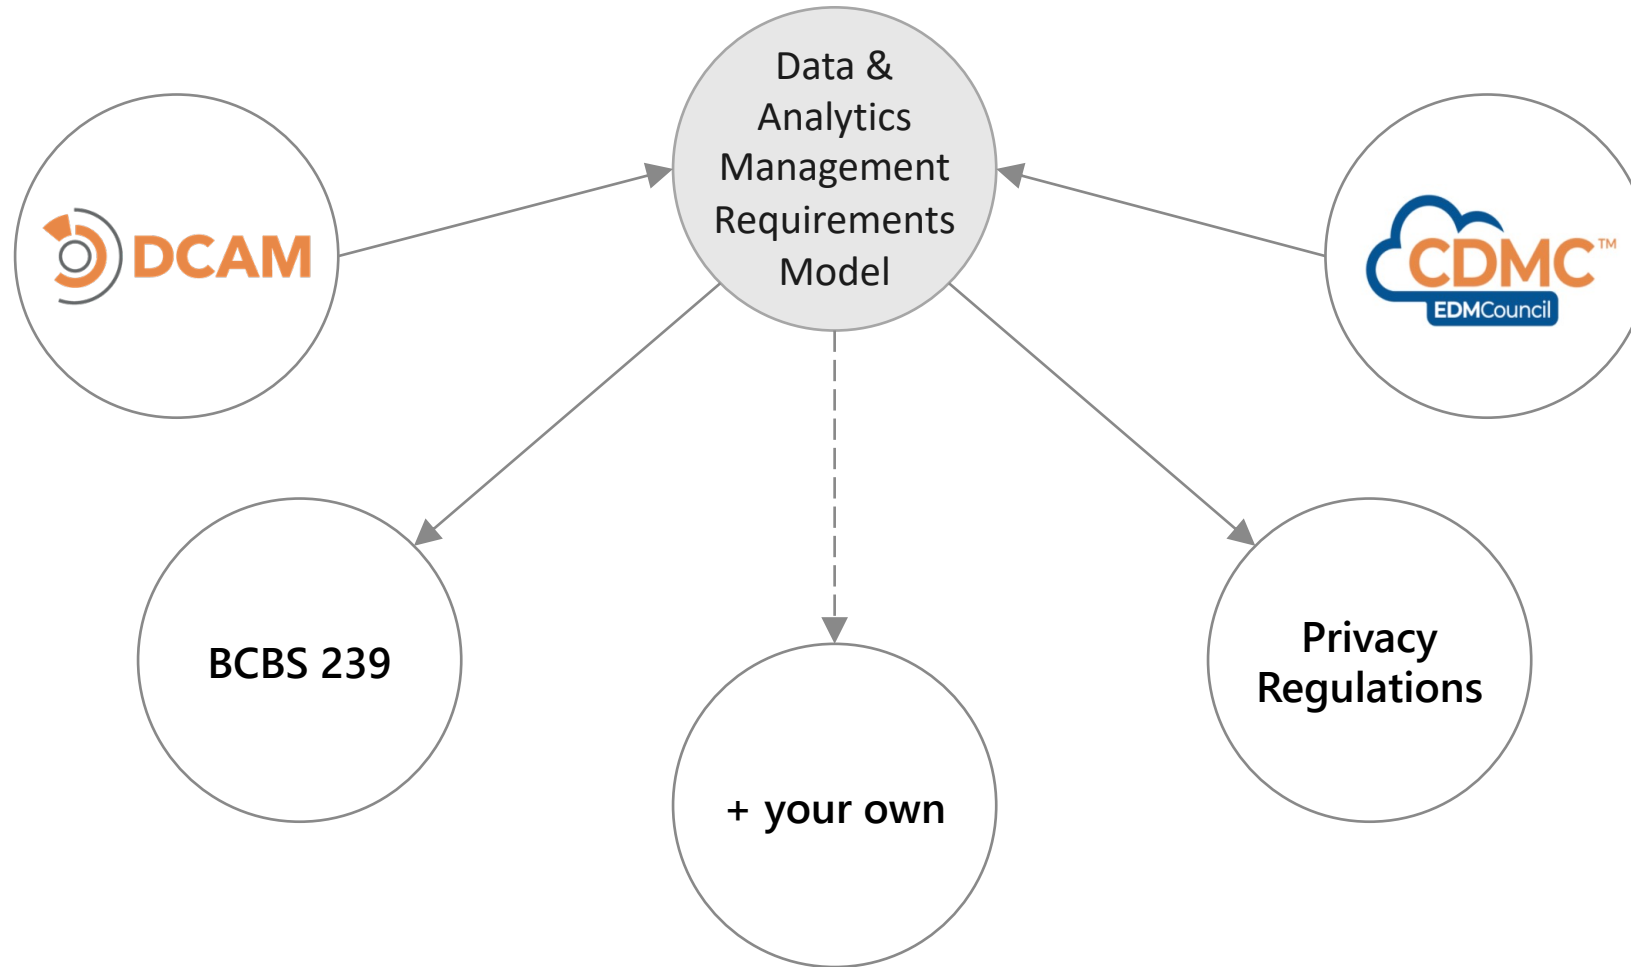

Our Moderator: Colin Gibson - Senior Advisor, EDM Council

- Colin is a senior executive and consultant with 30 years' experience in financial services
- He specializes in architecture, data governance and data management
- Previously head of data architecture for the investment banking divisions of RBS and HSBC and head of enterprise architecture for Willis Towers Watson
- Colin combines an enthusiasm for all things data with experience in software development, technology operations and management of major change programs

The purpose of the Requirements Model

Welcome to our presenters

Requirements Model

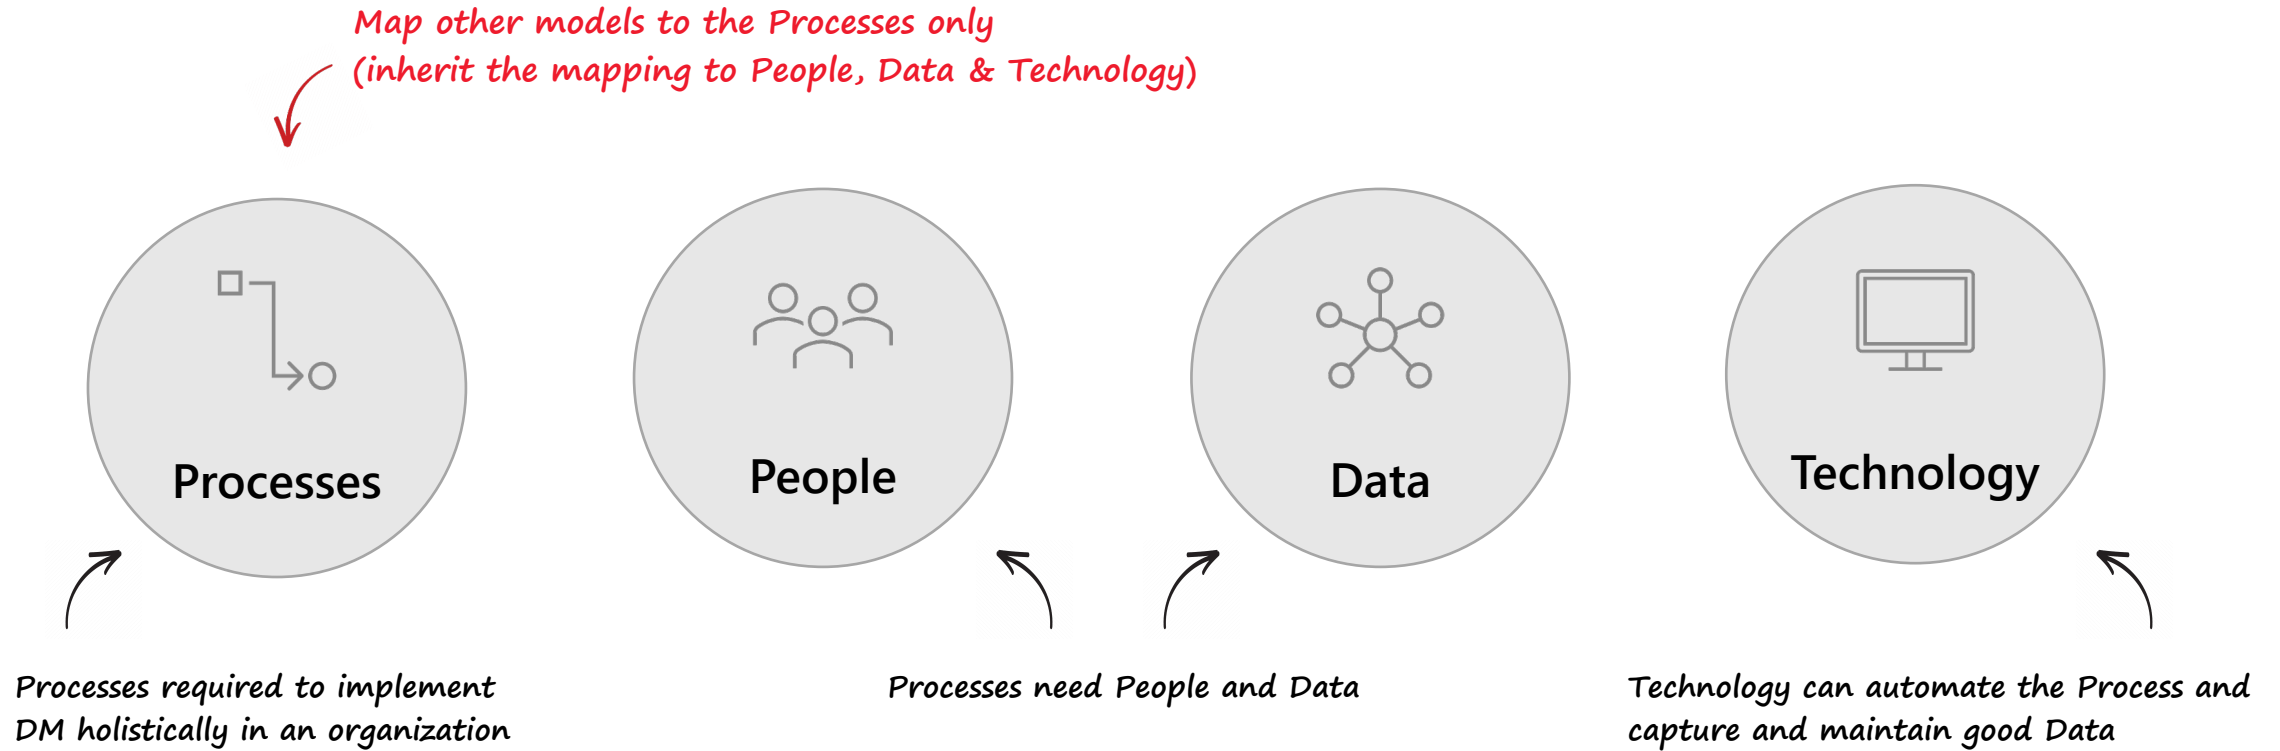

Mark McQueen

Managing Partner – US

Underlying requirements for managing your data

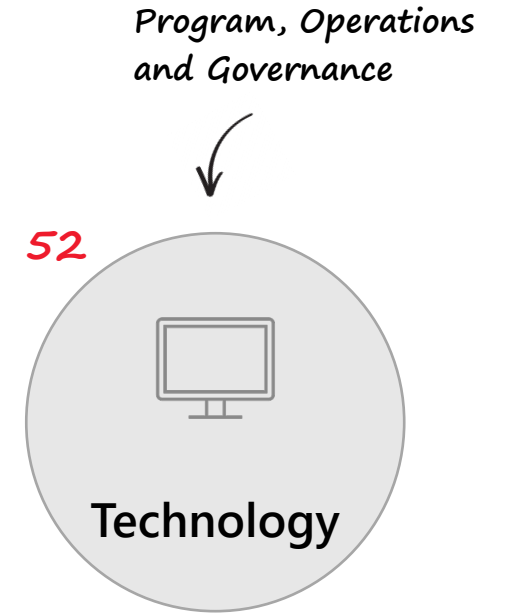

How it's structured

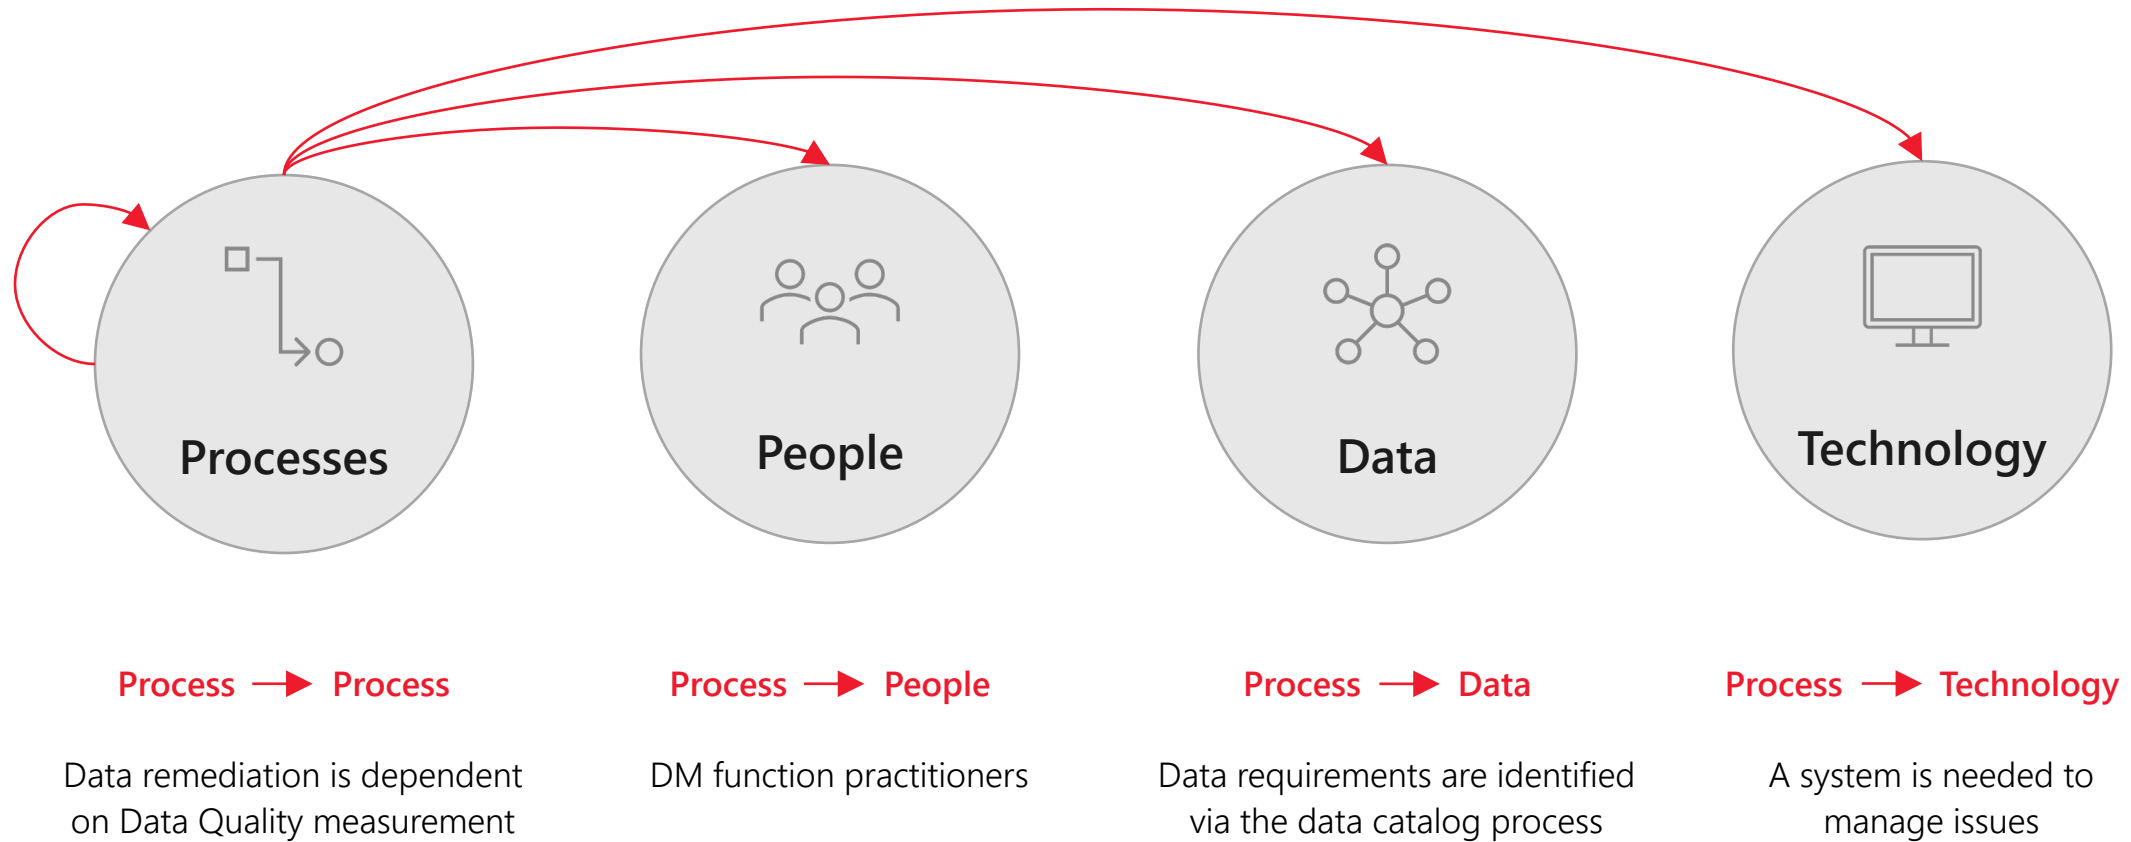

*Program, Operations
and Governance*

*Control Framework and
Standard Data Models,
Taxonomies & Metrics*

An example: Data Remediation

Adding DCAM & CDMC Frameworks

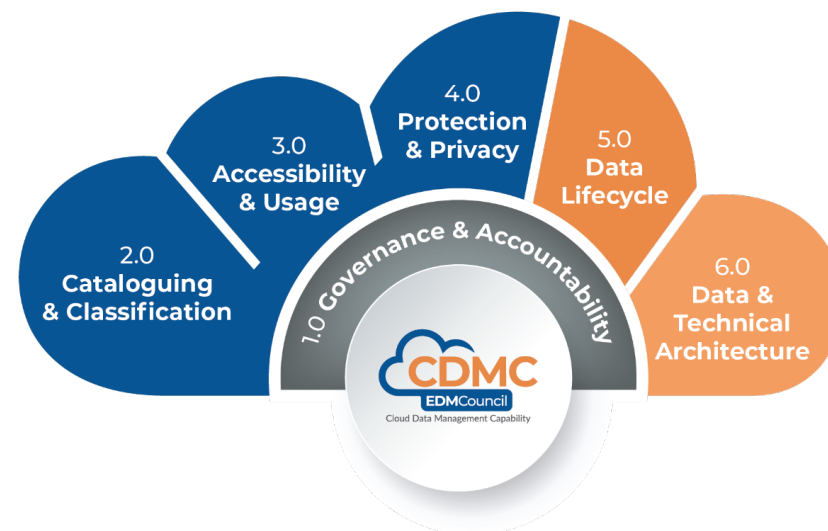

What are DCAM and CDMC?

DCAM® is the Data Management
Capability Assessment Model

DCAM is a comprehensive data & analytics
management framework

CDMC™ is the Cloud Data
Management Capability Model

CDMC is a framework that addresses the unique opportunities
and challenges of managing data in the cloud

These industry-standard best practice Data Management frameworks are developed by the EDM Council.
DCAM is available to members and CDMC is available as a free license to members and non-members.

Mapping DCAM/CDMC to the Requirements Model

DCAM Framework

1. Data Management Strategy & Business Case
2. Data Management Program & Funding Model
3. Business & Data Architecture
4. Data & Technology Architecture
5. Data Quality Management
6. Data Governance
7. Data Control Environment
8. Analytics Management

Requirements Model

Processes

People

Data

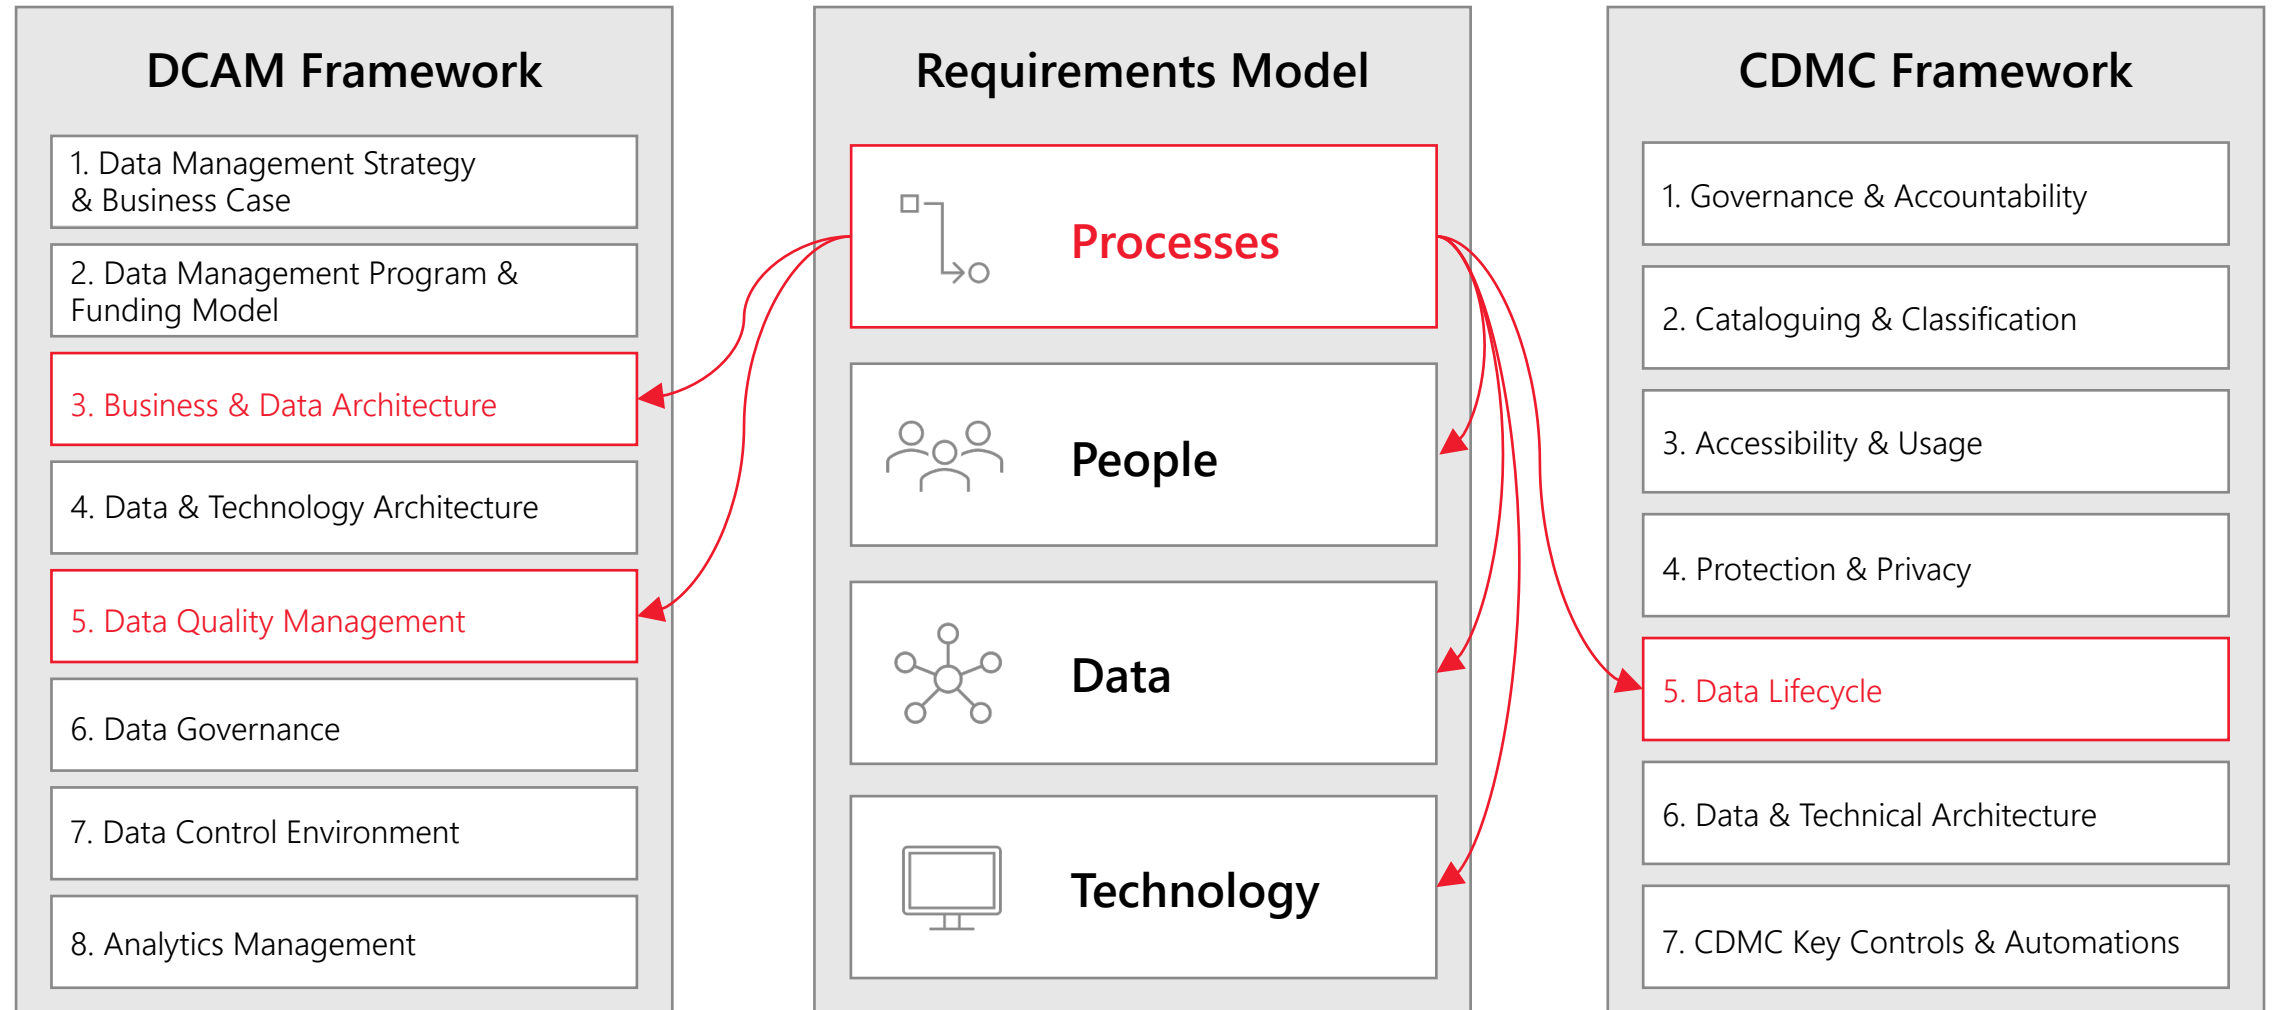

Technology

CDMC Framework

1. Governance & Accountability
2. Cataloguing & Classification
3. Accessibility & Usage
4. Protection & Privacy
5. Data Lifecycle
6. Data & Technical Architecture
7. CDMC Key Controls & Automations

Our example: Data Remediation

Our example: Data Remediation

Scenario 1: Anna is starting a greenfield Data Management function

Anna, new CDAO

- New DM function
- DCAM chosen
- Considering Cloud
- No Solidatus license

Using the DCAM & CDMC model, Anna can...

Prioritize and sequence her DM capability design, and align it to her start-up Data Strategy

Create a DM capability roadmap for the first year, which helps to build buy-in from the CEO and leadership team

Draw up the expertise and roles she needs to create an Office of Data Management

Start to articulate the value of managing data in the cloud

Scenario 2: Bob's done a DCAM Assessment and wants to improve his score

Bob, CDAO

- DM established
- DCAM Assessment
- Solidatus license

Using the DCAM & CDMC model, Bob can...

Add his DCAM scores to the model, at both at an enterprise level and for individual divisional groups

Compare DCAM scores across different divisions to identify capability gaps specific to certain teams

Reveal process dependencies and any gaps in his Data Management technology tool stack

Create a capability uplift plan and set uplift targets for the next annual DCAM assessment

Scenario 3: Charlie is starting to use CDMC

Charlie, CDAO

- DM established
- DCAM Assessment
- CDMC Assessment
- Solidatus license

Using the DCAM & CDMC model, Charlie can...

Add his DCAM Assessment scores and CDMC Readiness Assessment scores to the model, to identify capability gaps

Analyze the DCAM sub-capabilities that share a relationship to CDMC sub-capabilities to see the foundations he needs

Identify the areas that CDMC does not map to, to understand the basic capabilities still needed

Create an uplift roadmap to fill gaps in capabilities, based on the required dependencies and sequencing

Adding regulations

Philip Dutton

Co-CEO & Co-Founder

Aligning regulations: Privacy

Through analysis of the regulation, organize an interpretation object based on impacts to data or data management

Privacy Regulations

Privacy Thematic Areas

- Data Subject Rights
- Data Handling Rights
- Training
- Governance & Accountability
- Security
- Change Management
- Audit

GDPR

DCAM Framework

1. Data Management Strategy & Business Case

2. Data Management Program & Funding Model

3. Business & Data Architecture

4. Data & Technology Architecture

5. Data Quality Management

6. Data Governance

7. Data Control Environment

8. Analytics Management

Requirements Model

Processes

People

Data

Technology

CDMC Framework

1. Governance & Accountability

2. Cataloguing & Classification

3. Accessibility & Usage

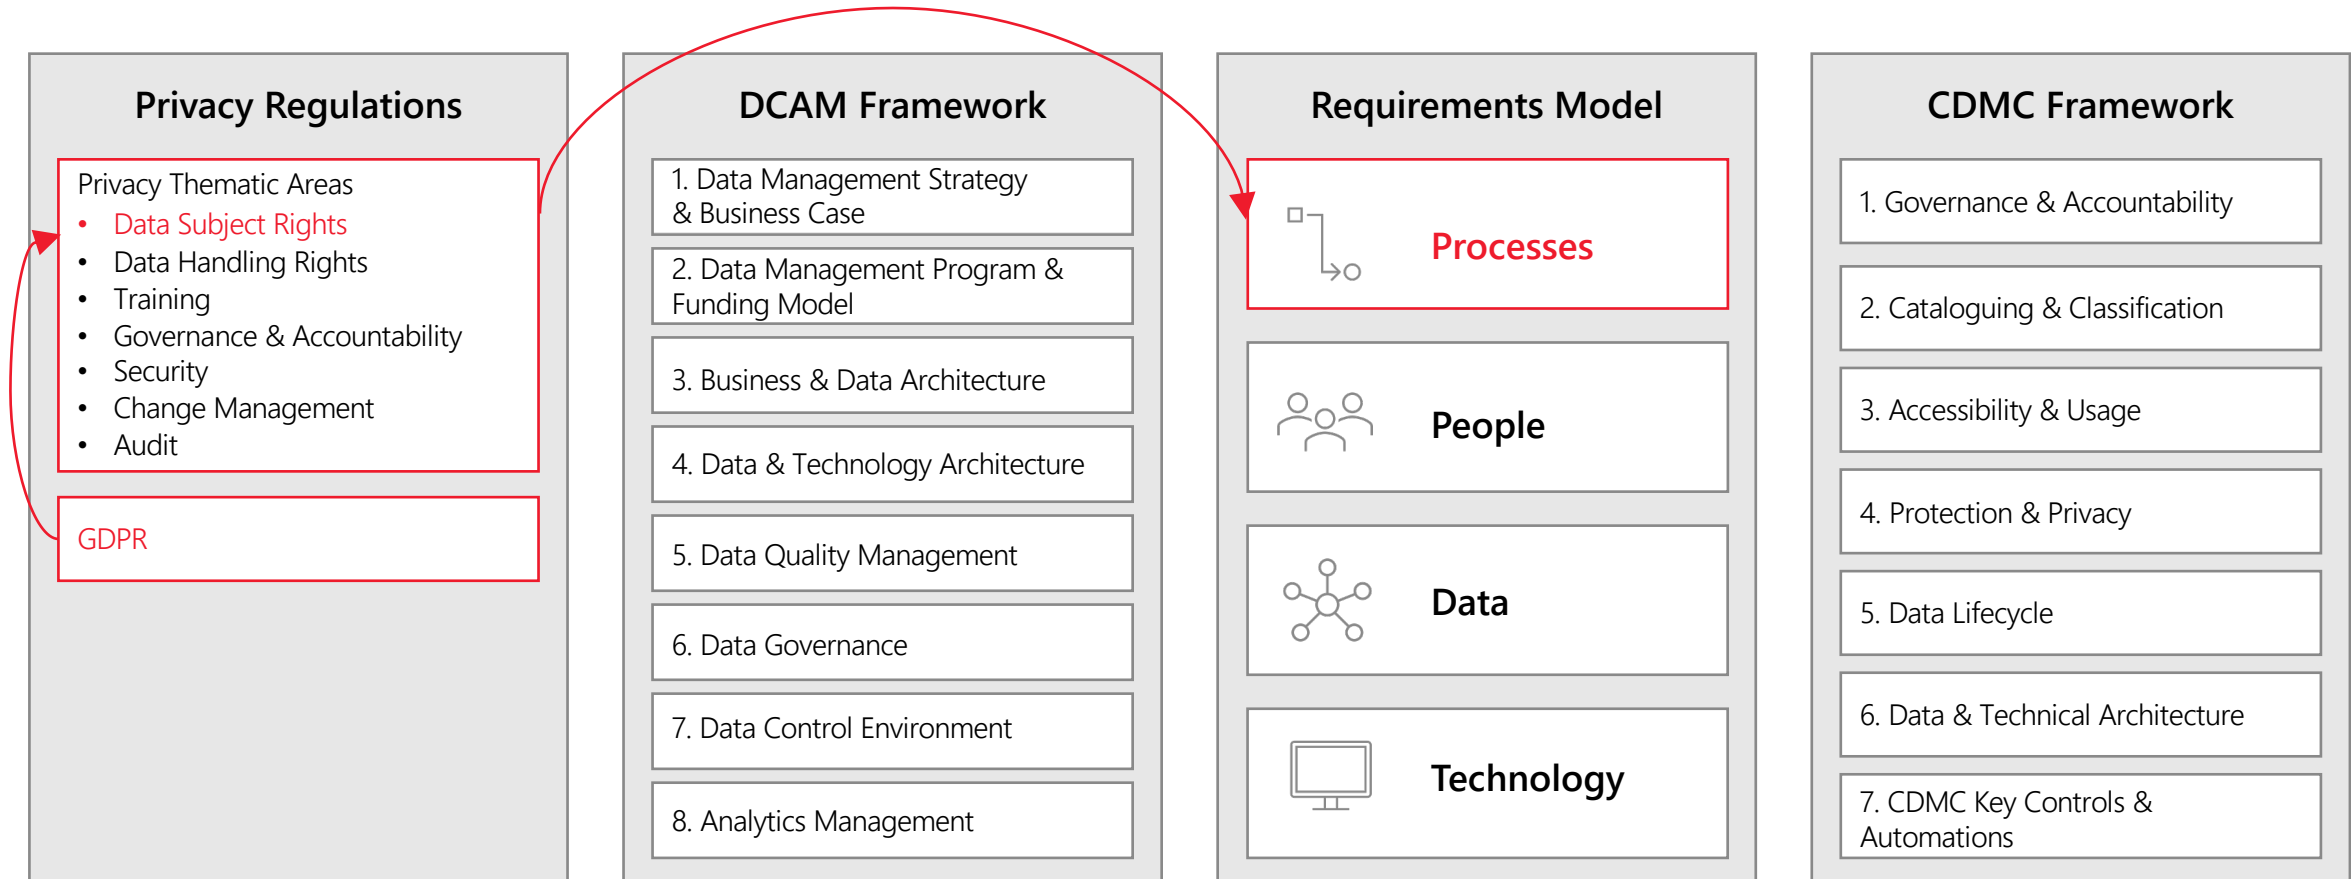

4. Protection & Privacy

5. Data Lifecycle

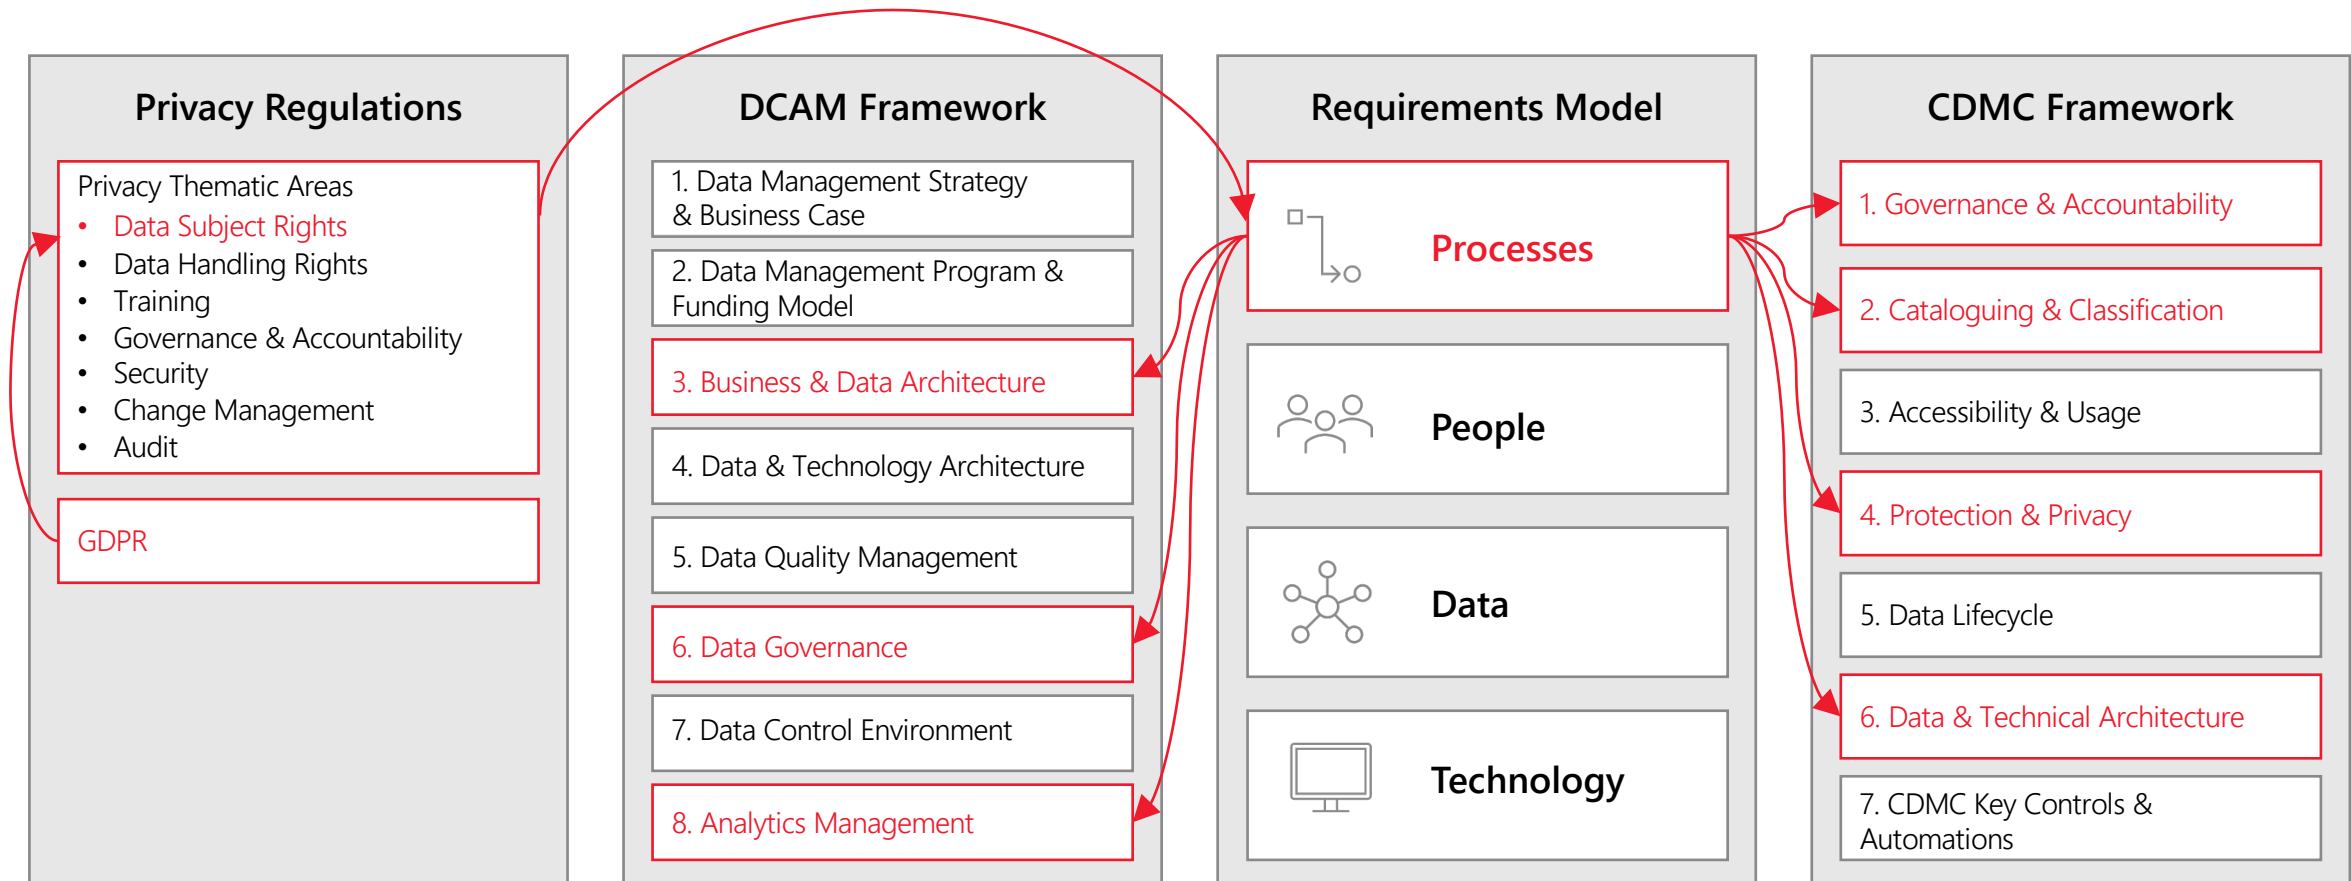

6. Data & Technical Architecture

7. CDMC Key Controls & Automations

Aligning regulations: Privacy

Aligning regulations: Privacy

Scenario 4: Deeksha is checking compliance with Privacy regulations

Deeksha, CDAO

- Privacy regulations
- Multi-jurisdiction
- DCAM Assessment
- Solidatus license

Using the Global Privacy Regulations model, Deeksha can...

Leverage the industry-standard GDPR requirements to gain understanding and internal approval quickly

Prioritize the data management capabilities required by the privacy process in her capability uplift plans

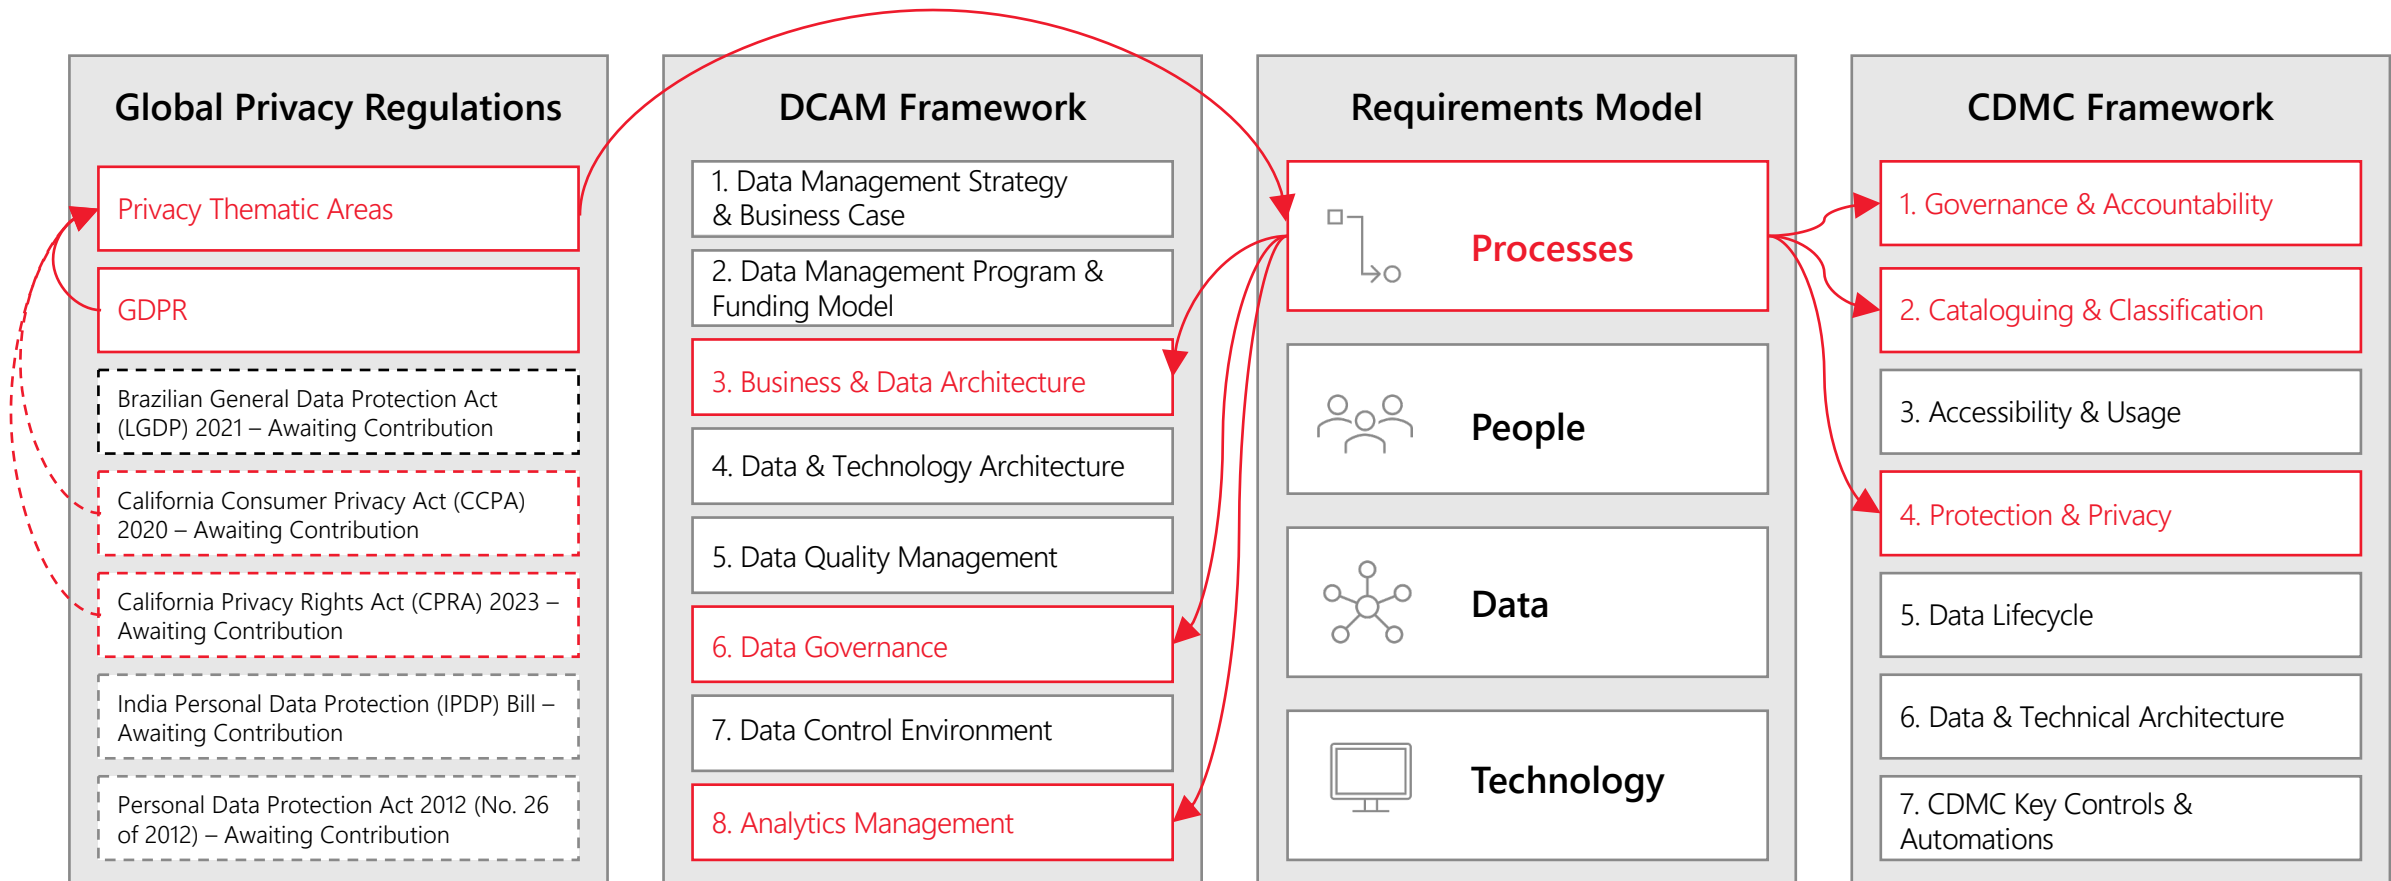

Use the model more broadly to help her Privacy Control team document their processes and compliance narrative

Work with her Chief Privacy Officer to align legislation from other jurisdictions in Solidatus

Aligning regulations: Privacy – making it global

From read to write: How best to leverage Solidatus

Discover

The impact of change

- Dependencies
- Gaps in our data management capability
- Identifying, defining and clarifying roles, responsibilities, workflows and controls

Visualize

Dynamic knowledge models that gave us a visual representation

- Technical guidance
- Best practices
- Simplified privacy compliance

Act

To accelerate and improve DCAM and CDMC assessments

- Linking them directly to our data, people, process, and technology
- Reducing costs by 15-20%
- Reducing risk of fines

License Options

EDMC Trial License

- Single author access to EDMC & Regulatory models
- Tag, classify, catalog, and link data
- Search & version control

Solidatus License

- Collaborate with multiple personas
- Suite of Connectors, API & SDK
- Workflow and automation
