# Generating business value from new data sources and use cases

Human movement in a changed world

Andy Bell | VP Global Product Management

Andy Peloe | Product Management Director

# The pandemic has transformed our way of

consuming

communicating

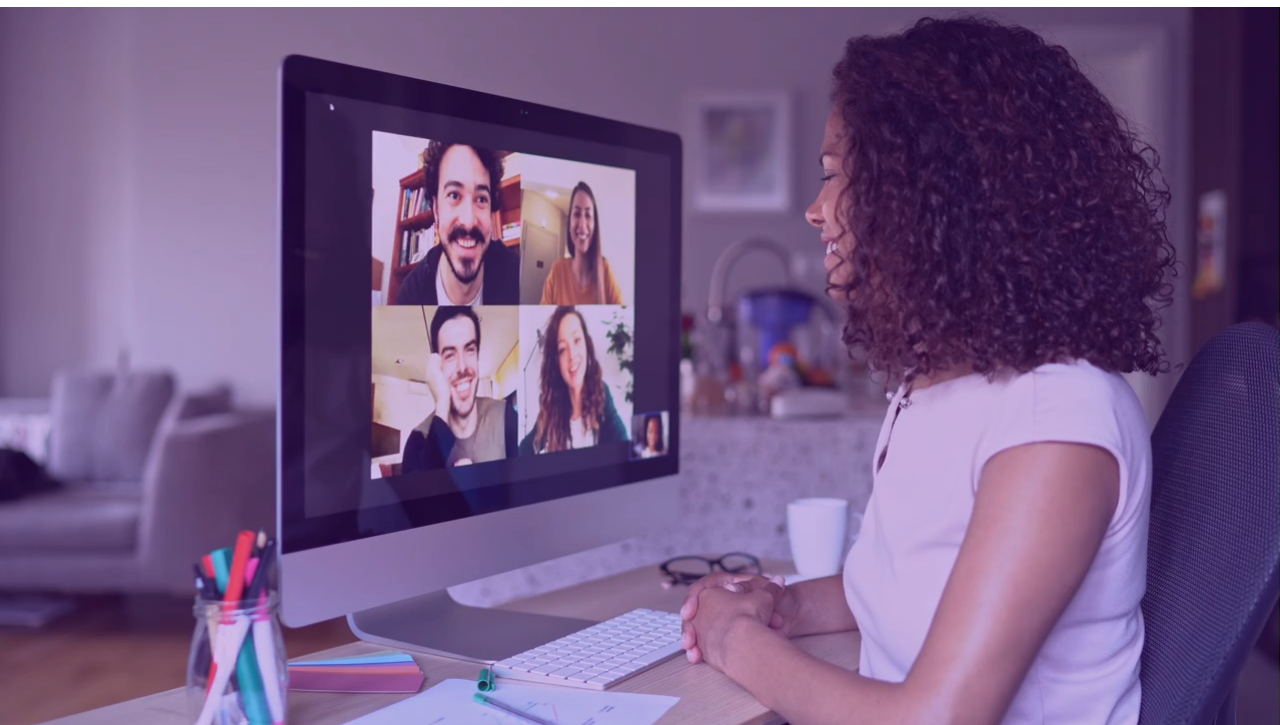

working

moving

# Poll Question #1

Has your company returned to the office?

1. Yes
2. No
3. Hybrid work

# 37% vs 27%

of UK employees were teleworking in 2020  
compared to 2019

More than 8 in 10 workers who had to work  
from home during the coronavirus pandemic  
said they planned to hybrid work <sup>1</sup>

**Businesses today are  
challenged to understand  
how populations move**

**How has post-pandemic  
population movement changed?**

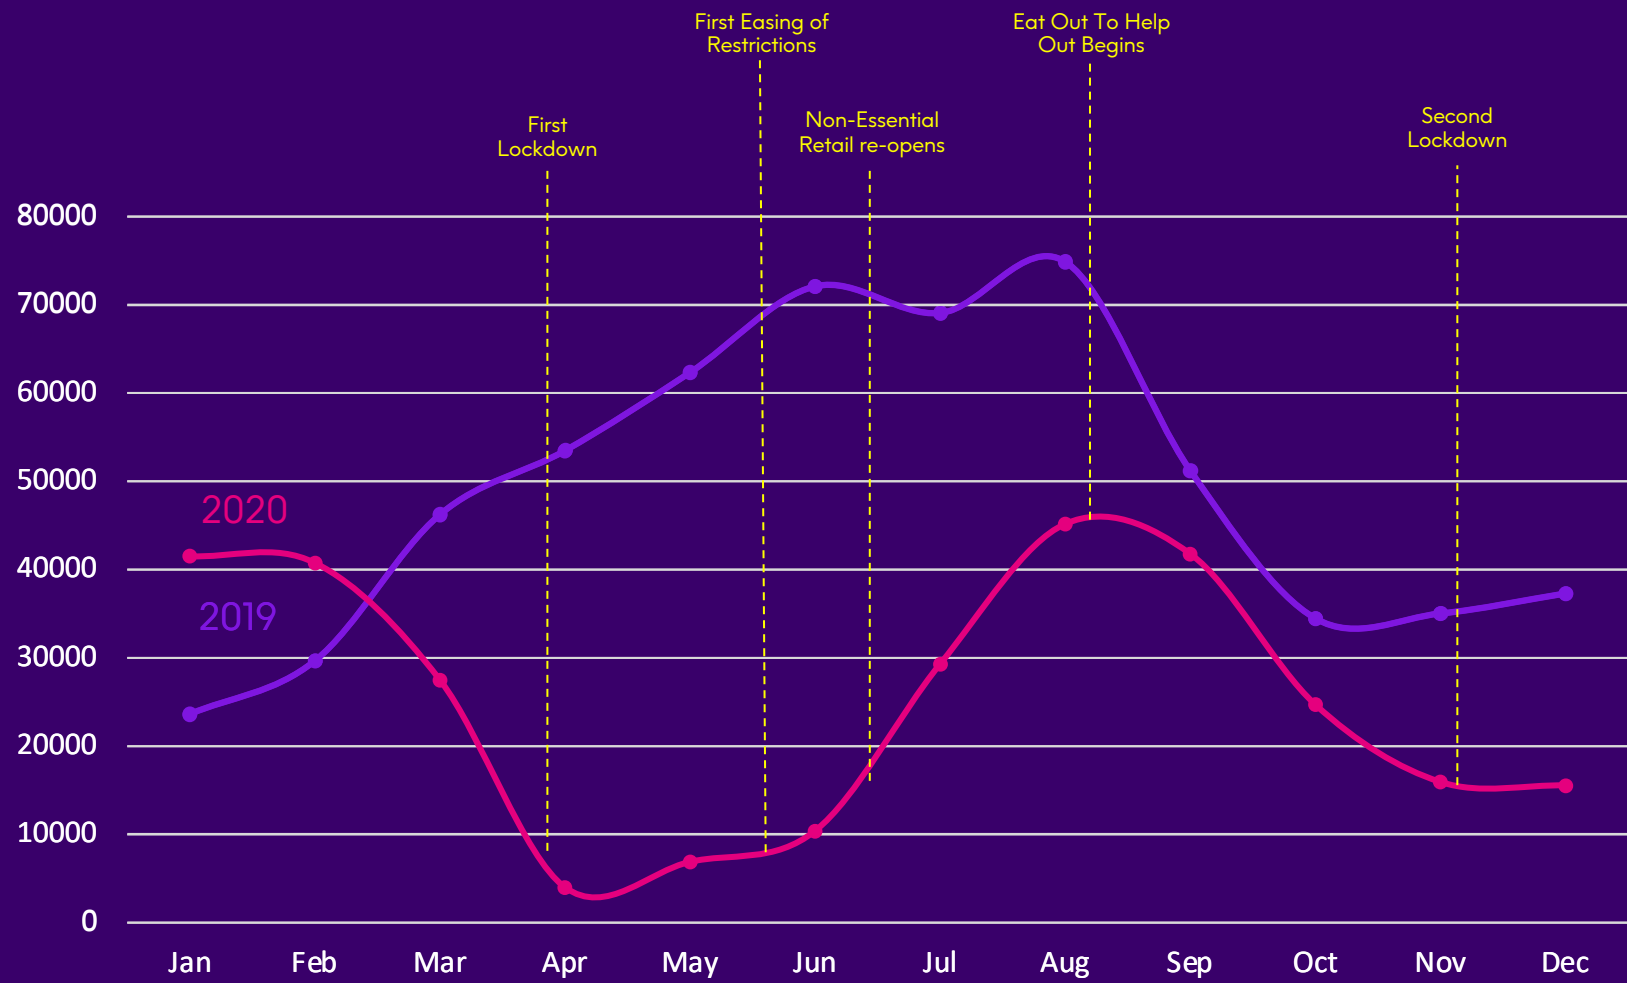

**How does this impact business  
performance?**

## Poll Question #2

Has the importance of technology increased since the pandemic?

1. Yes, it's more important now
2. No, it's less important now
3. It's the same as before

# Liverpool Central: Visitor Activity

**COVID Impact**

Drastic drop in visitors to city centre.

Eat Out To Help Out drives more in months after easing of restrictions

# Human Movement Use Cases

**Site selection**

- Understand popularity of a location and how it changes over time
- Demographic composition of visitors and impact on hours of operation and performance

**RETAIL & FINANCIAL SERVICES**

**Marketing and insight**

- Identify the areas from which visitors are attracted
- Understand if the attraction is business or leisure

**Residential home buyers**

- Help understand popular neighbourhoods and whether it's a quiet or busy location
- What types of people they can expect to be in the community

**REAL ESTATE & PROPTech**

**Commercial**

- Predict when tenants might not renew leases based on traffic in area
- Align rent to the popularity of a location and the demographics of visitors

**Changing coverage demand**

- Identify opportunities for expanding coverage based on knowledge of the types of people present at locations throughout the day
- Does the network cover the most popular destinations for customers?

**TELCO**

**Location and policy price**

- Understand the popularity of a location and the impact on claims, and therefore policy price

**INSURANCE**

**Visit types and risk**

- Analyze complex risks associated with popular areas and the types of people that visit those locations, which may relate to vandalism, fire, and attacks.

**Location and service provision**

- Understand demographic composition of a location and how it changes over time for service demand planning
- Understand mobility to better allocate services and resources
- Forecast changes and plan service delivery earlier
- Understand economic development opportunities by examining who visits and how much they can spend

**GOVERNMENT SERVICES**

**Out of home advertising**

- Types of people near digital billboards at different times
- What advertisements should be displayed

**MARKETING**

**Campaign targeting**

- Understand where customers visit and reside
- Promote specific events or products based on where customers originate from

“

Understanding human mobility patterns is a key consideration for our business. Dynamic Demographics from Precisely helps to provide actionable intelligence about the demographics of consumers that visit particular locations.

With that data we can better understand and target key customer profiles via our displays and be of better service to our clients, while driving campaign impact, awareness, and innovation with our digital out-of-home (DOOH) advertising.”

Head of Marketing  
Ocean Outdoor

## Poll Question #3

Has movement (shopping, travel, work, leisure) changed since the pandemic?

1. Yes, it changed a lot
2. Yes, it changed a little
3. No, it's back to normal

**Financial  
services**

**Insurance**

**Real Estate  
Proptech**

**Government  
Sector**

**Retail**

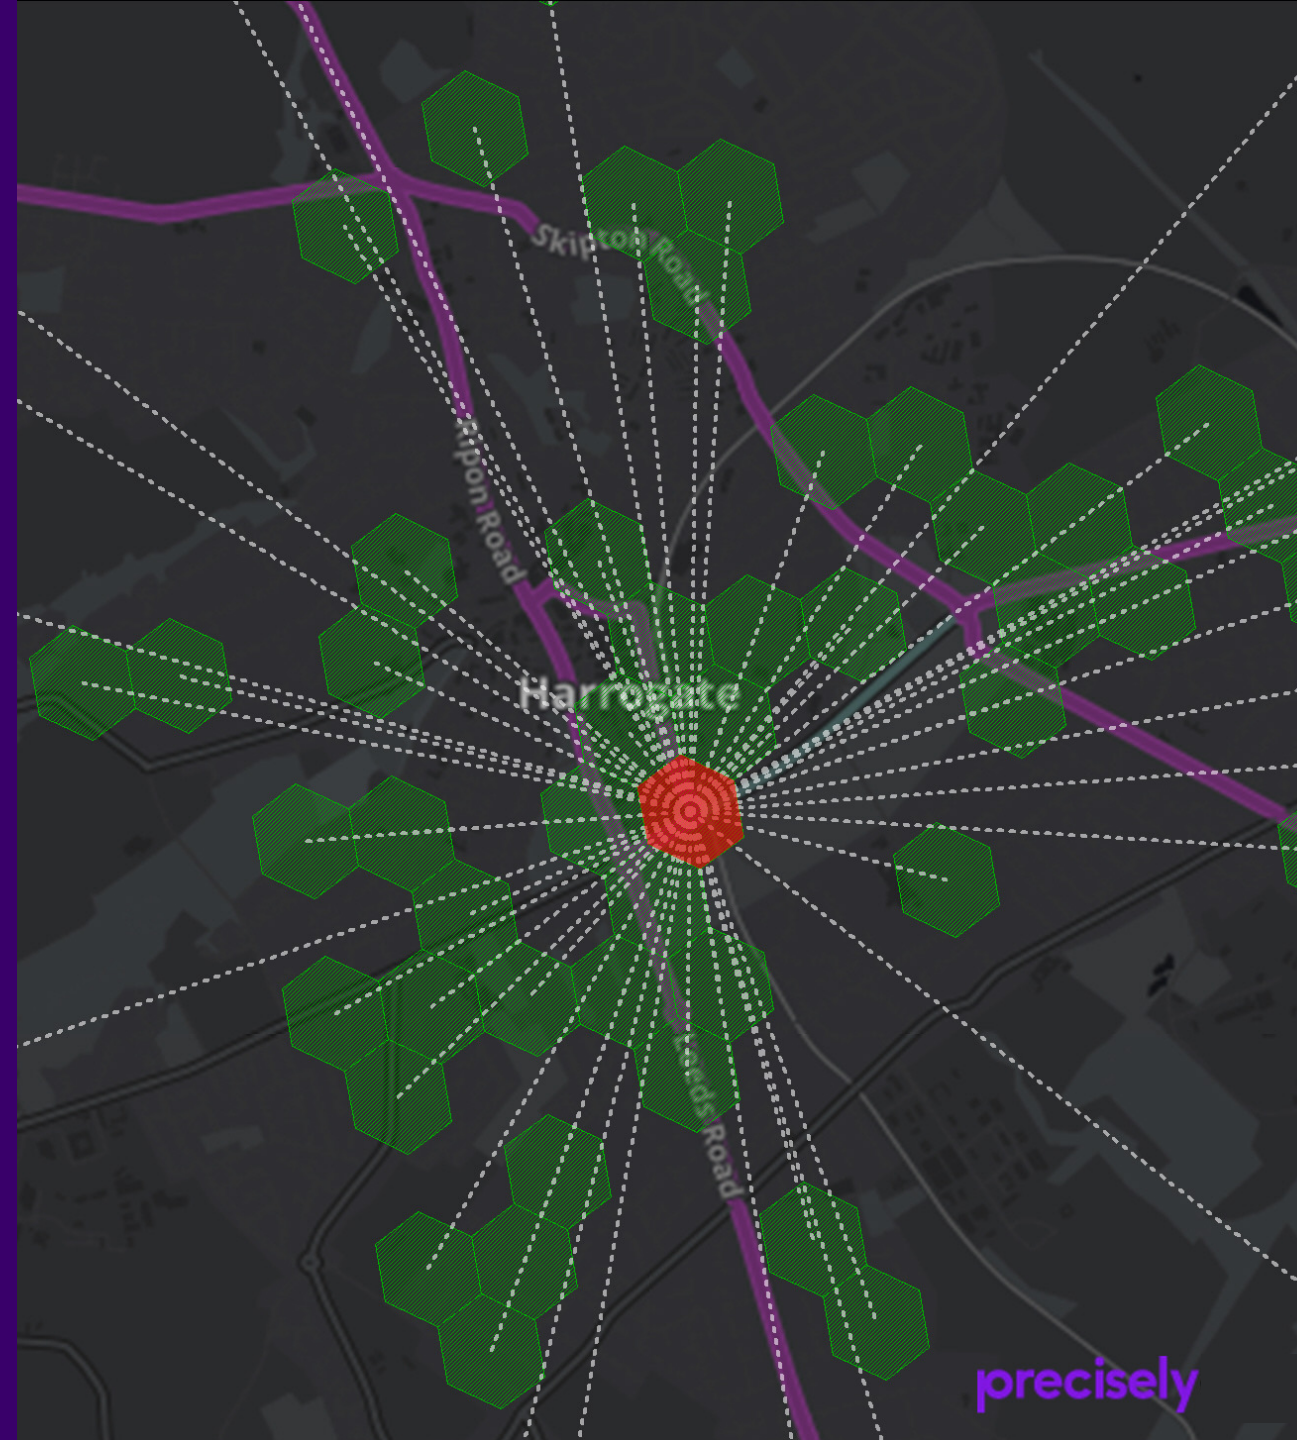

**Telco**

- You need to understand this change in how people work and live
- You need to know how it impacts your business
- Need to take action to manage your business to a post pandemic world

# Consider This

- If you want to apply Human Movement data, consider this:
- Ensure any solution is privacy led
- Good quality input data that is maintained
- Attention to detail from the supplier with clear methodologies
- Ensure you understand the geography being used
- Standard (Census Output Area) or artificial (Hex/Grid)

# Human movement data is not a silver bullet

- Ensure you have good data quality processes, data governance practices and data integration
- Then it will be a valuable input to making smart strategic decisions

# Dynamic Demographics:

An intelligent combination of data sources

## Mobility Data

- Where people go
- How frequently they go there
- How long they stay
- Where they go next

## Age & Gender

- 18-24
- 25-34
- 35-44
- 45-54
- 55-64
- 65-74
- 75+

## Purchasing Power

- Per-capita disposable income after the deduction of taxes and social contributions

## Consumer Styles

- Alphas
- Self-Indulgers
- Rooted
- Rooted
- Safety-Seekers
- Caretakers
- Idealists
- Trend Surfers
- Easy Going

## Boundaries

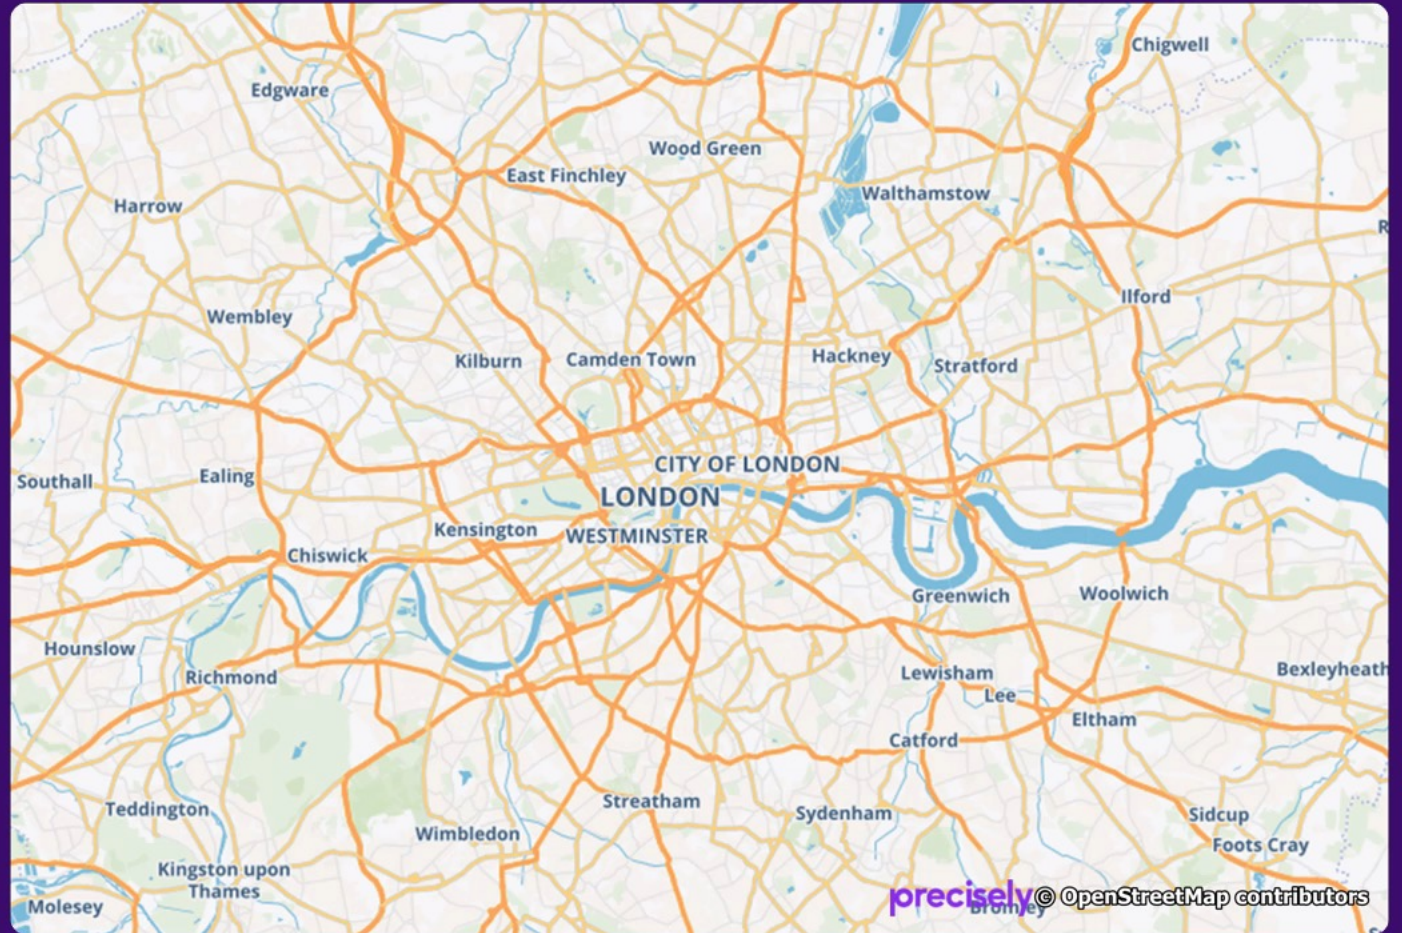

- Standard Geographies
- Uber Hex Level 9

# Dynamic Demographics:

An intelligent  
combination  
of data sources

- High density
- Above average density
- Average density
- Below average density
- Low density

# A highly relevant dataset for any organization interested in human populations, the way people move and how this impacts business performance

- Understand where people go
- Where specific demographic groups visit
- How the demographic profile of a place changes during the day and week
- **Maintains privacy using location profiles without personal information**
